

The World's First 100% Waterproof Luxury Vinyl Plank

Recommended Best Practices for keeping your LVP clean and free from damage

Congratulations! You're starting the day with your best foot forward[®] with your new 100% waterproof Aquatec Flooring[™] luxury vinyl plank flooring!

To keep this beautiful floor in top shape, please review these basic best practices of regular care.

DOs

- When spills happen, as they do, wipe them up immediately or as soon as possible.
- Keep up a regular routine of sweeping with a soft bristle broom or vacuuming (Avoid using a vacuum with a beater bar).
- Wash the floor with a soft (scrub-free) mop and warm water.
- You may also use a nonabrasive, neutral PH floor cleanser.
- For spot cleaning, you may also use a 10/1 ratio of water to liquid bleach.
- Remember to rinse your floor with fresh water after mopping.
- Use floor protectors under heavy furniture legs and never push, pull, or drag furniture across your Aquatec Luxury Vinyl Floors.

DON'Ts

- Never use harsh abrasives, granular detergents, or chemical cleaners.
- Never use glossing or waxing products.
- Never use solvent based or spray type polishes.

It is always recommended to use mats at entrances and exits to prevent dirt and corrosives from tracking onto the floor. If you have little ones, keep markers and coloring crafts away from flooring areas. If you find you have the appearance of a stain on the floor, you may try using a medium bristle brush with a small amount of dish liquid and rinse well with water. It's really that easy to keep your Aquatec Flooring™ Luxury Vinyl Plank clean and damage free.
